EXPRESS GLOBAL GROUP®

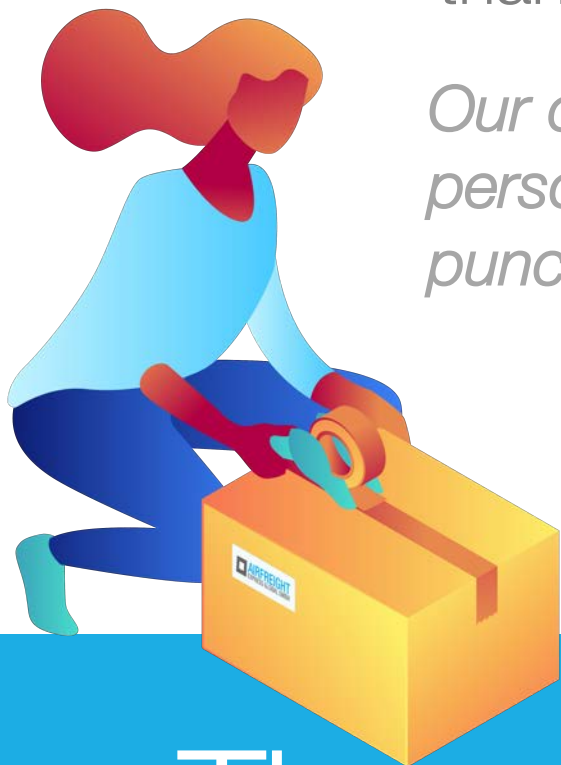

AIRFREIGHT  
EXPRESS GLOBAL GROUP

1

Customers appreciate that they are more than just a number for our employees!

*Our company values:  
personal service, trust,  
punctuality and quality.*

**The people**  
behind AIRFREIGHT

Your deliveries benefit from the competences of our specialist staff and our extensive network.

The global market for logistic services generates new challenges every day. Since company foundation in 2007, the team of AIRFREIGHT Express Global Group has become a worldwide and well-known specialist in time-critical transport solutions.

# The company

With our two locations in Munich and Frankfurt, we have the best prerequisites for providing professional services in all areas of logistics and customs clearance.

Our business is focused on international express airfreight transports.

Our customers also appreciate our expertise in the transport of dangerous goods, the emergency logistics and the special transport for biological samples.

Our secret and concept of success is an extremely engaged team, a profound expertise, a cost-efficient operation and a 100% guaranteed availability.

24 hours a day  
365 days a year,  
all around the world!

## EXPRESS- AIRFREIGHT

We load national or international passenger planes (IATA direct) or cargo planes (IATA consol). If necessary, we organize an own cargo compartment or a full charter for your order.

Our NFO-Service standard guarantees the next flight out for your goods. The only exception is transporting dangerous goods with its fixed rules & regulations. Therefore we offer special handling.

There are explosive and sensitive goods that cannot be trusted to just anyone - experts with experience, training and authorizations according to the relevant transport laws are required. AIRFREIGHT Express Global GmbH is certified for classes 1 and 7.

Do not waste your time on ADR, DGR, IMO documents, packaging or delivery forms.  
Consult the expert for hazardous materials at your side.

HAZARDOUS  
GOODS

# EMERGENCY LOGISTICS

A spare part is missing and the parking meter counts every minute your airplane is waiting.... in this case you can rely on our emergency service.

Even it seems nearly impossible, we continue to meet your requirements with our 24-hour stand-by service, the right contacts and enough experience.

Our live tracking-system for packages is a crucial tool in delay prevention and reaction. Time is money, but sometimes it's also about your reputation.

For pharmaceutical supply chains we have a zero time delay tolerance. For successful delivery you need a company with an excellent service and a lot of experience in express service.

In addition to live tracking, a temperature logger monitors transport and storage temperature of your goods (blood samples, stem cells, bone marrow, cell cultures, organs transportation). The certification according to UN3373, Category B officially confirms us of being able to provide a professional pharmaceutical supply chain.

BIO-  
LOGISTICS

## ON-BOARD COURIER

An important document has to be on the other side of the world tomorrow? You forgot your suitcase in a hotel in Dubai? Call the Airfreight specialists!

Of course we accept your requirements and time settings. You can leave the responsibility for documents and commodities of up to 30 kg in our hands. Our team offers on-board-courier service (OBC-Service) for aircraft, road and rail traffic.

We help you with customs classification for your goods. Our experts provide legal advice on fundamental decisions (mode of declaration). At the same time we are in close contact with the responsible customs office. This applies to all European Union countries as well as to all Schengen/EFTA (European Free Trade Association) member states.

Approvals, certifications, refunds of duties, formal objections and clearing documents – our knowledge is the solution for customs consultancy and customs clearance.
